

STUDENTS

RIGHTS AND RESPONSIBILITIES – Student Conduct – Married or Pregnant Students

Married students are encouraged to continue with their existing program of education. If they desire to withdraw from school, they may do so regardless of age.

A pregnant student shall be encouraged and allowed to remain in school as long as her physician deems it advisable. When the physician deems it advisable for the student to no longer attend school, alternative educational programs will be made available through the District.

Home Hospital Instruction (HHI) is provided for students who are no longer able to attend the traditional school day. HHI can be used for the expected date of birth of the child and postpartum care of the child. A written statement from a physician and a completed HHI Medical Certification from the physician are necessary in order for a student to access these services. HHI forms can be accessed through the guidance office at the school. All completed HHI documents should be returned to Student Support Services.
